

# IngeniaTouch

**Introducing new eco-friendly technologies to Food, Facility and Hygiene Companies**

- Food / Beverage Preservation Technology (replacement to salt)
- Food Safe Sterilization Technology (replacement to chlorine & triclosan)
- Eco-Friendly Clean Water Technology (replacement to aggressive chemicals)
- Self-Cleaning Glass Technology (superhydrophobic / superhydrophilic coatings)
- Anti-Slip Pavement & Floor Technology (enhanced health & safety)
- Employee Health at Work Technology (flu / virus risk protection)
- Eco-Property Protection (mildew, mold, fungi)
- Healthcare Property Eco-Sterilization Technology (Citrox fogging /misting)

*Our eco-friendly technologies are all 100%  
natural, tested, certified and clean-label.*

*100% Natural*  
*Sustainable for clean living*

**Eco-Friendly**

Biotechnology at its best

*Alternative to toxic chemicals*

*Citrox dry-spray following the daily office cleaning process will radically reduce the bacterial burden for office staff.*

*Healthcare organizations can dramatically up their game by deploying dry-Citrox missing technology throughout their facilities.*

We have demonstrated the remarkable reduction in the bacterial load and the efficacy to eliminate MRSA and related hospital pathogens without adverse risk to patients, staff, animals or the environment. French research confirms the negative impact of sterilization by chlorine on healthcare staff and alarmingly the high correlation with cancer.

*Our technologies are designed to address the increasing cancer levels in society, to enhance food quality and food wastage, to address sickness in the workplace and provide where appropriate safe alternatives to banned chemicals such as triclosan. Consumers the world over demand clean-label and safe products. Be part of the new clean janitorial revolution!*

## Clean-Label

Never before has the food, beverage and pharma sector had such great opportunities to explore new methodologies for fresh produce preservation.

Our range of food-safe preservation ingredients are flexible and customizable, enabling all stakeholders to enjoy brand enhancement and higher shelf-life standards.

Our new sterilization methodologies transform the janitorial sector, offering new revenue streams, enhanced methods to address bio-film risk, safer workplaces, hospitals and homes.

**IngeniaTouch Ltd**
