

Introducing *Ingenia*, possibly the world's best face mask.

The year 2020 changed a lot in our lives. The mouth and nose mask are now a constant companion. Without a mask one can no longer go shopping, enter a restaurant or other public facility.

We all know the oppressive feeling when you or your skin cannot breathe properly and the confusion caused when faces are not 100% visible.

No one likes working behind fogged-up visors. Facial recognition in many hospitality settings are a key feature of quality service.

We now have a solution:

The *Ingenia* mask offer the highest level of comfort and hygiene technology. *Ingenia* lies comfortably on the ears and can also be used by people who wear glasses. *Ingenia* is transparent and does not pull on the ears.

This is especially important for people who are required to wear a mask all day and need a comfortable and safe alternative to a cloth mask.

Each mask comes with a state-of-the-art protective external microbiota barrier coating designed to inhibit bacteria and viruses. Internal surfaces are anti-fog and antimicrobial. We can also include a Covid-19 certified antimicrobial cleaner if required.

antimicrobial
antifogging
viral-spore/ bacteria repellent
comfortable to wear

- ✓ mask surface internal & external antimicrobial
- ✓ antifogging
- ✓ hydrophobic microbiota barrier / spore-bacteria / water droplet repellent
- ✓ micro-scratch proof and robust
- ✓ comfortable to wear
